Ravikant Pandit

Full-stack Developer

Helsinki, Finland
codewithravikant@gmail.com
github.com/codewithravikant
linkedin.com/in/ravikant-pandit

SKILLS

Programming

TypeScript · JavaScript · Go · Python · SQL · C · Bash

Software & data

React / Next.js · Node.js · PostgreSQL · REST APIs · Automated tests

DevOps & delivery

Git / GitHub · GitHub Actions · CI/CD · Docker · Linux/Unix · Vagrant · Ansible · Jenkins · Make · Nginx

Generative AI — completed

Prompt design · Function calling · RAG · pgvector · Coding assistants

DevOps — ongoing to Jan 2027

Kubernetes · Prometheus · Grafana · ELK · Helm · ArgoCD · Terraform · Cloud

LANGUAGES

English — fluent
Finnish — A2, studying
Hindi — native

EDUCATION

kood/Sisu
Helsinki · 2025 – Jan 2027

24-month software programme. Generative AI module completed. DevOps module ongoing — completes January 2027 (Linux, Docker, CI/CD in progress; Kubernetes, observability, GitOps, Terraform, cloud next).

Piscine Helsinki
Four-week intensive in C

Software Development Academy
Helsinki · 2020

University of Rajasthan
Bachelor of Arts · India · 2013

PROFILE

Full-stack developer in kood/Sisu's 24-month programme in Helsinki. I build end-to-end web applications — TypeScript, React/Next.js, Node.js, PostgreSQL — from design through testing and deployment. Generative AI module completed; DevOps is my ongoing focus and completes in January 2027 with the programme. I care about what happens after code is written: pipelines, containers, Linux servers, and automation. Strong with TypeScript, GitHub Actions, Docker, and generative AI — growing into Kubernetes, Terraform, cloud, and platform engineering.

SELECTED PROJECTS

Automation-VMs — multi-VM DevOps lab
Ansible · Jenkins · Docker

github.com/codewithravikant/Automation-vms

- Built a six-VM Ubuntu lab (load balancer, web, app, backup, CI/CD) with Vagrant, Make, and idempotent Ansible: SSH hardening, UFW, Docker, nginx LB, and automated backups/restore.
- Ran Jenkins CI/CD with a local registry: lint, audit, Trivy scans, deploy, rollback, and optional Slack alerts; shipped a containerized React/Express diagnostics app behind the LB.

FitNexus — Generative AI full-stack app
TypeScript · GenAI · CI

github.com/codewithravikant/chat-assistant

- Built a full-stack wellness app with Next.js, React, TypeScript, PostgreSQL, and Prisma, including an AI coach with function calling, prompt verification, and RAG over recipes with pgvector.
- Added email/password login, GitHub/Google OAuth, TOTP 2FA, field encryption, Docker, GitHub Actions CI, 200+ unit tests, and Playwright E2E tests.

Multiplayer Snake — deploy & operate
Node.js · Railway

github.com/codewithravikant/Snake-multi-player · live demo

- Built a real-time multiplayer service and deployed it to Railway, practising end-to-end delivery from local development to a live environment.

More kood/Sisu DevOps coursework (private Gitea) available on request.

EXPERIENCE

Senior Business Manager
Nov 2017 – Aug 2018

Bharti AXA Life Insurance

- Coordinated a 15-person team; practised clear communication, ownership, and structured problem-solving.

Agency Development Manager
Mar 2016 – Dec 2016

IFFCO Tokio General Insurance

- Self-directed recruiting and business development in a regulated financial-services environment.

Earlier insurance and sales roles in India. Relocated to Finland and retrained as a software developer.
