Ravikant Pandit

Full-stack Developer · DevOps

Helsinki, Finland
ravikantpandit1985@gmail.com
github.com/codewithravikant
linkedin.com/in/ravikant-pandit

SKILLS

Languages

TypeScript · JavaScript · Go · Python · C · Bash · SQL · HTML/CSS

Frontend

React · Next.js · Tailwind CSS

Backend & data

Node.js · Express · REST APIs · Socket.IO · PostgreSQL · Prisma · MongoDB

DevOps

Linux/Unix · Docker · Vagrant · Ansible · Jenkins · CI/CD · GitHub Actions · Nginx · Make · Git · SSH / UFW · Trivy

Continuing — DevOps

Kubernetes · Helm · ArgoCD · Terraform · Prometheus · Grafana · ELK · GitOps

AI

Prompt design · Function calling · RAG · pgvector

LANGUAGES

English — fluent
Finnish — A2, studying
Hindi — native

EDUCATION

kood/Sisu
Helsinki · 2025 – Jan 2027
Generative AI completed; DevOps module in progress.

Piscine Helsinki
Four-week intensive in C

Software Development Academy
Helsinki · 2020

University of Rajasthan
Bachelor of Arts · India · 2013

PROFILE

Full-stack developer completing kood/Sisu's 24-month software programme in Helsinki, graduating January 2027. I build end-to-end web applications — from design through testing and deployment. After completing the generative AI track (FitNexus: RAG, function calling, OAuth/2FA), I am continuing with DevOps: multi-VM labs, Ansible, Jenkins CI/CD, Docker, Linux hardening, and load balancing. Next: Kubernetes, GitOps, and Terraform. Earlier sales and insurance work taught me to understand customer needs and take ownership of results.

SELECTED PROJECTS

Automation-VMs — multi-VM DevOps lab
Ansible · Jenkins · Docker
github.com/codewithravikant/Automation-vms

- Built a six-VM Ubuntu lab (load balancer, web, app, backup, CI/CD) with Vagrant, Make, and idempotent Ansible: SSH hardening, UFW, Docker, nginx LB, and automated backups/restore.
- Ran Jenkins CI/CD with a local registry: lint, audit, Trivy scans, deploy, rollback, and optional Slack alerts; shipped a containerized React/Express diagnostics app behind the LB.

FitNexus — AI wellness platform
TypeScript · Next.js
github.com/codewithravikant/chat-assistant

- Built a full-stack wellness app with Next.js, React, TypeScript, PostgreSQL, and Prisma, including an AI coach with function calling, prompt verification, and RAG over recipes with pgvector.
- Added email/password login, GitHub/Google OAuth, TOTP 2FA, field encryption, Docker, GitHub Actions CI, 200+ unit tests, and Playwright E2E tests.

Multiplayer Snake — real-time game
Node.js · Socket.IO
github.com/codewithravikant/Snake-multi-player · live demo

- Built a 2–4 player real-time game with a server-authoritative Socket.IO backend, client-side interpolation, NPC mode, chat, and accessibility options.
- Deployed to Railway; used vanilla JavaScript on the client for 60 FPS DOM rendering.

Additional kood/Sisu coursework lives in a private Gitea instance and can be shared on request.

EXPERIENCE

Senior Business Manager
Nov 2017 – Aug 2018
Bharti AXA Life Insurance

- Led planning and task coordination for a 15-person team, and identified opportunities for business development.

Agency Development Manager
Mar 2016 – Dec 2016
IFFCO Tokio General Insurance

- Recruited and supported agents, and generated business through professional networks.

Earlier sales and insurance roles in India. Relocated to Finland and retrained as a software developer.
